# ULTRA-SAUNA ELECTRIC HEATER

PREFERRED BY ARCHITECTS AND BUILDERS SINCE 1962

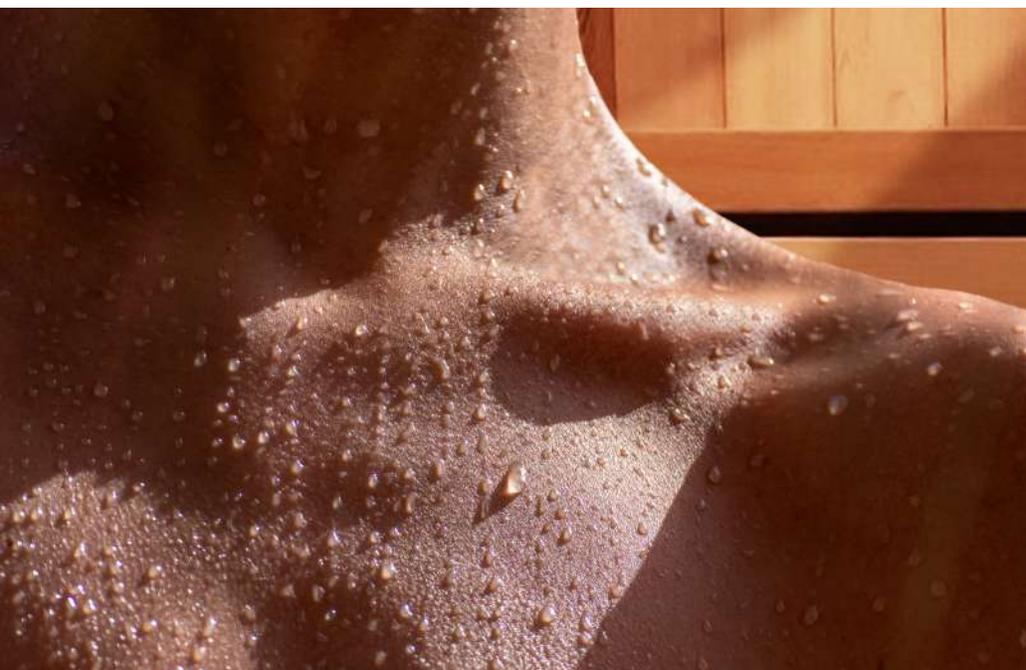

# INTRODUCTION

---

Scandia Ultra-Sauna Electric Heaters are manufactured for use in a wood sauna room. Our sleek, compact, and 100% stainless steel design creates a beautiful and highly functional heater. These units also incorporate an elevated rock tray to prevent damage during the application of water and utilize a convection-style airflow.

All Scandia Electric Heaters are wall-mounted, wire directly into the building, and include wiring connections and lead rated for high-temperature applications.

They have our Smart Sauna Wi-Fi Controller, which is a screen connected to a smartphone application. With this System, you can control your sauna anywhere in the world.

# FEATURES

---

High-quality and highly durable. Made from 22-gauge brushed stainless steel

Heats from 140 to 1,680 cubic feet (depending on model)

Unique, solid steamer tray design allows for water pouring while keeping the heating elements dry and protected

UL Listed

Built-in thermal cut-out protects against overheating

Includes sauna rocks, installation instructions, 60-minute timer, and thermostat sensor wall cover

Features an unprecedented 10-year warranty on the shell and one-year warranty on parts

# MODELS SIZES

---

**Scandia Ultra-Sauna  
Electric Heater Small**  
(3.0 - 4.5 KW)

**Scandia Ultra-Sauna  
Electric Heater Medium**  
(6.0 - 9.0 KW)

**Scandia Ultra-Sauna  
Electric Heater Large**  
(12.0 - 18.0 KW)

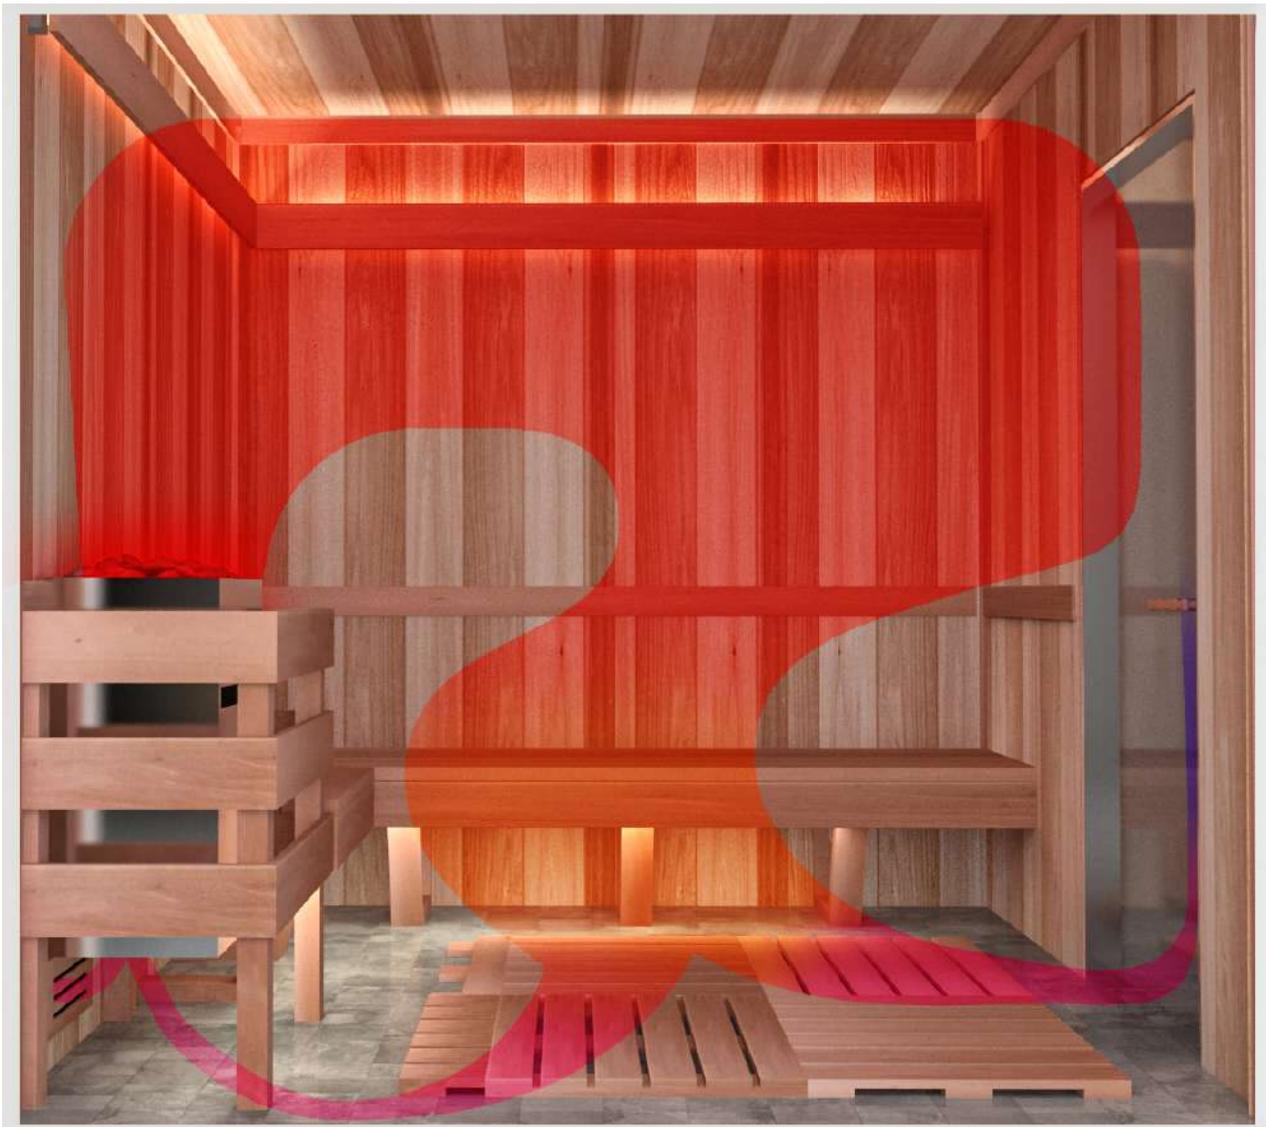

# HEAT FLOW

---

Some may believe that a sauna must be completely sealed so none of the heat escapes, ultimately wasting energy. This however is untrue. We put this myth to rest when we developed a quality air ventilation system. Air circulation is vital to keep the users healthy and to also maximize the benefits of sauna bathing.

The system consists of placing vent cover under the heater so that it can take fresh air from the outside and immediately heat it, and this air is distributed from top to bottom, this you have two options:

- Evacuate under the door (all our saunas have 1 inch of separation between the door and the floor to speed up air circulation).
- Enter once more under the heater to be heated again.

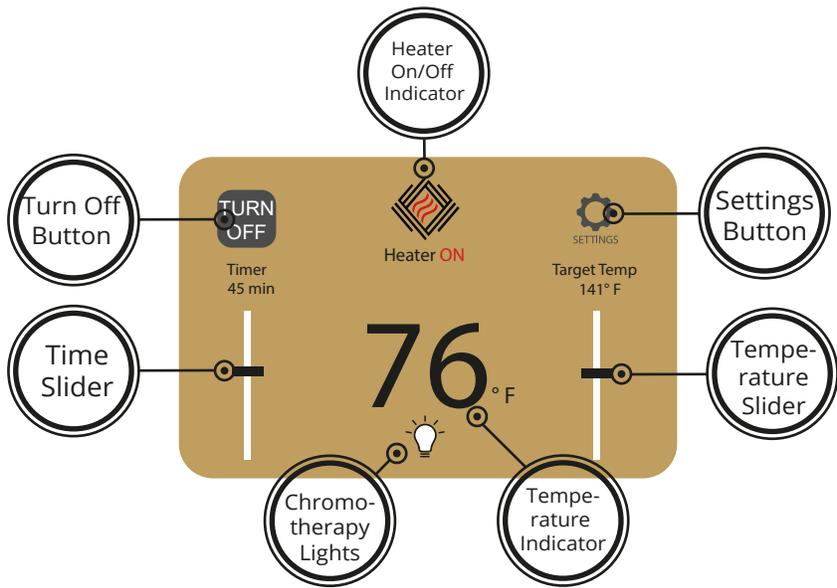

# SMART SAUNA WI-FI CONTROLLER

REVOLUTIONIZE YOUR SAUNA EXPERIENCE

Our Smart WiFi Controller allows you to control your sauna remotely from anywhere in the world with a smartphone app.

## FEATURES

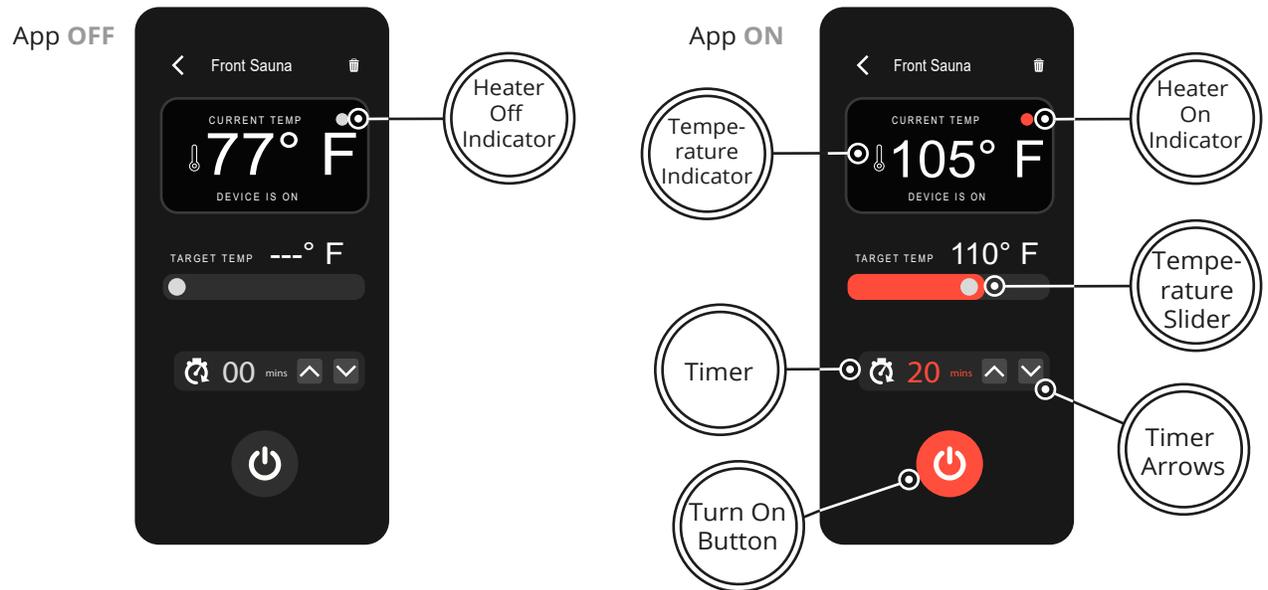

-  Time selector from 0 to 60 minutes
-  Temperature option from 75 to 180 °F
-  °C / °F option
-  Control the Ultra-Sauna Heater in the mobile application anywhere and anytime
-  3.5" Touch Sreen Controller
-  Integrated to the Cloud
-  Chromotherapy Lights

# ABOUT OUT APP

Although the WiFi Heater Controller and the Scandia Smart Sauna App have similarities, the ideal is to have both.

The main feature of the Scandia Smart Sauna App is that you can control your sauna from anywhere in the world. In other words, you can turn it on, regulate the temperature, and the chromotherapy lights so that when you arrive, the sauna is ready to use.

Our app is available in:
